OBAR INSTRUMENTS

EDG Environmental Data Gateway

Wireless EDG Site Monitoring Solution

1,000 Foot Range with 10+ Year Battery Life

Superior Wireless Range
1,000 + ft. line of sight up to 10-12 walls*

Long Battery Life
10+ Years when Powered by 2 AA batteries**

On Board Data Memory
Stores up to 512 readings per sensor.***

Future Proof
Over-the -air updates allow products to be updated remotely.

Low Cost Monthly Fees
Plans begin at $13.25 per month for up to 6 sensors.

Create a mobile EDG network using the over 50 Obar EDG Sensors or add 3rd party sensors with 0-10V or 4-20ma output.
EDG Wireless Sensors will relay your Site Data to the EDG Wireless Gateway

EDG Wireless Gateways send data to the cloud platform where you can customize sensor settings, manage data, generate alerts and manage multiple user profiles.

Easily access to your EDG Network and data with the Obar app on your cell phone or your desktop.

Imagine the Possibilities
Create a wireless mobile data collection network that can be customized for each site. Networks can be deployed for a day, a week, a month, or years and cost as little as $13.25 a month for 6 sensors including cell service for the gateway. Wireless Gateways start at $225 and Wireless Sensors at $49.

Making Monitoring Work

It's not enough to have a great product.

We Understand

We understand the environmental industry and challenges associated with site management, so we developed a monitoring platform specifically to meet your needs.

Ease of Use

Installing networks and devices couldn't be easier. We have an app for that!
Network devices can be installed simply by scanning the device QR code with our mobile app or by inputting the ID in the online portal from your desktop.

Support

We know the product and the industry and are able to support your staff and clients.
We can develop unique solutions for site specific monitoring needs.

Flexibility

We know the complexity of managing multiple sites with different clients and various monitoring requirements in each state, so we created an easily managed platform that allows for different levels of administration and billing. In essence, there can be a master account that sees all projects while individual accounts can be managed locally by assigned users and billed separately. These accounts can also be either established for or transferred to the client while your firm may continue to get notifications and access to the data needed produce reports.

Stability and Longevity

Obar has been in business for over 35 years and we understand that a system or platform has to be stable and supported . We partnered with a world leader in remote monitoring to do just that. As a result, our platform and technology will continue to evolve and grow with time. We will continue to be here with support for our clients and provide the latest products and technology.
